PROFESSIONAL SUMMARY

Motivated B.E. graduate in Artificial Intelligence and Machine Learning with strong foundations in software engineering and computer science fundamentals. Proficient in Python, JavaScript, SQL, and Object-Oriented Programming with hands-on experience in full-stack application development. Good understanding of Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, and Software Development Life Cycle (SDLC). Passionate about learning new technologies, solving real-world problems, and contributing effectively in collaborative software development teams.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, SQL
- **Web Technologies:** HTML, CSS, React.js
- **Backend Technologies:** Flask, FastAPI, REST APIs
- **Databases:** MySQL, MongoDB, SQLite
- **Computer Science Fundamentals:** Data Structures and Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks
- **Software Engineering:** SDLC, Git, GitHub, Agile Methodology, Debugging, Software Testing
- **Development Tools:** VS Code, Docker, Google Colab
- **Libraries:** Pandas, NumPy, Scikit-learn

EXPERIENCE

Dhee Coding Lab Feb 2026 – May 2026
Python Full Stack with Gen AI Trainee *Bengaluru*

- Developed responsive web applications using React.js and Python following Software Development Life Cycle (SDLC) practices.
- Built REST APIs using Flask and FastAPI for backend services.
- Applied Object-Oriented Programming concepts to develop reusable and maintainable software components.
- Used Git and GitHub for version control and collaborative software development.
- Performed debugging, testing, and code optimization to improve application performance.
- Worked in Agile development environment while collaborating with team members on project deliverables.

Rail Wheel Factory Mar 2025 – Apr 2025
Software Engineering Intern *Bengaluru*

- Assisted in developing internal software applications using C# and .NET Framework.
- Applied Object-Oriented Programming principles to develop clean and maintainable code.
- Performed debugging and testing to identify and resolve software issues.
- Collaborated with team members following Agile software development practices.
- Used Git for version control and maintained technical documentation.

PROJECTS

CareerForge – Explainable Analytics Platform (Live) Jul 2026 – Oct 2026

- Built a full-stack web application with a REST API backend and React frontend, spanning frontend, API, and database layers.
- Designed a relational (PostgreSQL) data model and wrote SQL queries with server-side validation and reusable data-access logic.
- Implemented rule-based matching with a 115-skill dictionary and a transparent, auditable scoring formula.
- Applied security best practices: safe upload validation, session authentication, per-user data isolation, and rate limiting.
- Ensured quality with 254 backend tests (96% coverage), 57 frontend tests, and Playwright E2E tests in GitHub Actions CI/CD.
- Deployed on Render with Neon PostgreSQL; Docker configuration provided for containerized self-hosting. **Live:** careerforge-h362.onrender.com

Cross-Market Volatility Prediction System Sep 2025 – Jan 2026

- Developed a Python-based application for analyzing financial market data.
- Performed data preprocessing using Pandas and NumPy.
- Applied machine learning techniques for volatility prediction and performance evaluation.
- Implemented testing and debugging to improve prediction accuracy.
- Used Git for version control throughout the project lifecycle.

EDUCATION

MS Engineering College 2022 – 2026
B.E. in Artificial Intelligence and Machine Learning (CGPA: 7.5/10.0) *Bengaluru*

CERTIFICATIONS

- Python Programming
- Machine Learning with Python – IBM
- Complete Python Bootcamp – Udemy

ADDITIONAL INFORMATION

- **Languages:** English, Kannada
- **Soft Skills:** Problem Solving, Communication, Teamwork, Adaptability, Analytical Thinking, Quick Learner
- **Areas of Interest:** Software Development, Backend Development, Full Stack Development, Problem Solving
